CHM 4300L, Laboratory in Biochemistry & Molecular Biology

Spring 2016

Professor
Jon D. Stewart
Office: 102 Leigh Hall
Phone: 352.846.0743
E-mail: jds2@chem.ufl.edu

Office hours
Monday, 2nd period 8:30 – 9:20 a.m.
Tuesday, 2nd period 8:30 – 9:20 a.m.
Wednesday, 2nd period 8:30 – 9:20 a.m.

Teaching Assistants
TBA

Course Objectives
CHM 4300L provides a hands-on opportunity to learn basic techniques in molecular biology and biochemistry including the polymerase chain reaction, DNA cloning, plasmid isolation and characterization, protein purification and steady-state kinetics.

Prerequisites
CHM 2211, CHM 2211L and either CHM 3218 or BCH 4024.

Grading
Three lab reports (100 points each) will be due over the course of the semester [due on February 11 or 12 (depending on section), March 24 or 25 (depending on section) and April 25 (all sections)]. Guidelines for each lab report will be distributed at least one week before each due date. Lab notebooks will also be graded at these times for accuracy and completeness (100 points total). Four short (20 minute) quizzes will be given at the beginning of pre-lab lectures at unannounced times during the semester (total 100 points). These quizzes will cover material for that week’s lab only. The experiments in this course are arranged in a series, and the product from one week serves as the starting material for the next. If you have problems, you will be provided with intermediate materials with no grade penalty. You will be expected to analyze critically where the problem(s) lay in your lab report, however, and this will be graded (see above). Current UF grading policies can be found at https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx.

Class Attendance
Attendance is required at all laboratory sessions; please be on time!
Attendance at pre-lab lectures is strongly suggested. Please do not schedule school visits, interviews, etc. during lab periods.

Make-Up Work
Because they are unannounced, there are no make-up quizzes. Students with an allowable excuse should see the Instructor to arrange accommodations if they miss a quiz.

Required Textbook

Laboratory Schedule
A calendar of scheduled experiments is available at the Canvas e-Learning site (http://lss.at.ufl.edu).
**Laboratory Attire**

Department of Chemistry approved SAFETY GLASSES or GOGGLES (only Astro OTG 3001 or American Optical 91214 Goggles) must be worn any time you are in the laboratory. Protective clothing (long pants, shirt/blouse and proper shoes) is required any time you are in the laboratory and it must be worn at all times while in the laboratory. A more detailed discussion of laboratory safety is available on the course e-Learning site (http://lss.at.ufl.edu).

**Academic Honesty**

We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

*All portions of the quizzes and lab reports are to be completed individually.*

**Students with Disabilities**

Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodations. Students with disabilities should follow this procedure as early as possible in the semester.

**List of Experiments**

Laboratory 1  Introduction to CHM 4302L Laboratory Techniques
Laboratory 2  Cloning Strategy, Introduction to Restriction Enzymes, Agarose Gel Electrophoresis and the Polymerase Chain Reaction
Laboratory 3  Estimating the Concentration of the PCR Amplification Product by Gel Electrophoresis, PCR Clean-up, Digestion of the Expression Vector and PCR Product
Laboratory 4  Purification of DNA by Preparative Agarose Gel Electrophoresis and Purification of DNA from Agarose Gels
Laboratory 5  DNA Quantification of Purified hCA2 DNA and pETBlue-2 Vector DNA, Ligation of hCA2 DNA to pETBlue-2 Vector DNA and Transformation into *E. coli* NovaBlue
Laboratory 6  Screening pETBlue-2 Recombinants for hCA2 Insertion
Laboratory 7  Transformation of pETBlue-2 / hCA2 into *E. coli* TunerTM(DE3) pLacI
Laboratory 8  Pilot Expression of Recombinant TunerTM(DE3) pLacI pETBlue-2 / hCA2
Laboratory 9  SDS-PAGE Analysis of the hCA2 Pilot-Scale Induction Experiment
Experiment 10  Expression and Partial Purification of Carbonic Anhydrase from Recombinant *E. coli*
Experiment 11  Gel Filtration Chromatography of Partially-Purified Carbonic Anhydrase
Experiment 12  Constructing a Purification Table for Carbonic Anhydrase Isolation and Kinetic Assays
