TEXTBOOK: Chemistry: The Molecular Nature of Matter and Change (6th Edition)
by Martin Silberberg (McGraw-Hill)

INFORMATION: CHM 2045 and CHM 2045L constitute the first semester of the two term sequence of General Chemistry, CHM 2045-2045L-2046-2046L. This sequence is suitable for all science and engineering majors. **To continue into CHM 2046, you must earn a grade of C or higher in CHM 2045 and have MAC 1140, or MAC 1147 or calculus I or the equivalent of these or higher completed.** (Statistics does not count.)

PREREQUISITES: Credits: 3; Prereq: MAC 1147 or the equivalent, passing score on ChRA or passing grade in CHM 1025; Coreq: CHM 2045L.

The first semester of the CHM 2045/2045L and CHM 2046/2046L sequence. Stoichiometry, atomic and molecular structure, the states of matter and reaction rates. A minimum grade of C is required to progress to CHM 2046. (P) A detailed list of course objectives is listed at the end of this syllabus.

Warning!! If you drop your math class and do not have MAC 1147 or the equivalent or higher you **will not** be able to go on to CHM 2046 even if you pass CHM 2045! Read the Guide to Majors catalog. **This means that you must be taking the correct math this term or have it show on your transcript. You will be ejected from CHM 2046 at the start of the next term even if the system allows you to register if you do not have the proper math prerequisite.**

Lecture schedule: I will follow this schedule very closely.

COURSE SCHEDULE (lecture schedule is tentative)

Section # _____; Discussion day and location _____

Dates	Topics (# of lectures)	Chapters
06 – 08 Jan	Introduction and Review: Atoms, Molecules, and Ions (2)	Chap. 1–2
10-13 Jan	Mass Relations and Stoichiometry (2)	Chap. 3
15-17 Jan	Aqueous Reactions (2)	Chap. 4
Wednesday, Jan 29 (8:20-10:20 pm)	Progress Exam 1	Chaps. 1–4
31 Jan – 05 Feb	Enthalpy & Calorimetry	Chap. 6
07 – 10 Feb	Atomic Structure	Chap. 7
12 - 17 Feb	Electron Configuration and Periodic Trends	Chap. 8
19 - 24 Feb	Chemical Bonding Models	Chap. 9
Wednesday, Feb 26 (8:20-10:20 pm)	Progress Exam 2	Chaps. 1–4, 6–9
28 Feb – 12 Mar	Molecular Geometry (2)	Chap. 10
	Spring Break 3 to 7 Mar	
12 – 17 Mar	Covalent Bonding Theories (4)	Chap. 11
21 - 26 Mar	Gases (3)	Chap. 5
28 Mar. - 02 Apr.	Intermolecular Forces and Liquids and Solids (5)	Chap. 12
Thursday, April 03 (8:20-10:20 pm)	Progress Exam 3	Chaps. 1–12
04 – 11 Apr.	Solutions (4)	Chap. 13
14 – 23 Apr.	Chemical Kinetics (5)	Chap.16
Wednesday, 30 April 10:00 am until 12:00 noon	Final Exam	Cumulative All material covered in the term!

HOLIDAYS (no classes): Jan 20 (MLK Day); 03 to 07 March (Spring Break)

Online Assessments: 1/14, 1/22, 1/28, 2/11, 2/18, 2/25, 3/18, 3/25, 4/1, 4/15, 4/22, 4/29

TIPS: Chemistry is very much a "learn by understanding" subject. Because of this you must work in this course to do well. That means you should read the textbook, work on the website, and do the electronic homework until you understand! Then you should work extra problems (from the book) to test your understanding.

On Line Assessments (QUIZZES): All Quizzes will be taken on-line and a separate schedule will be posted. Twelve (12) Quizzes will be given. **No makeup quizzes will be given for any reason.** As with the progress exams, to accommodate unavoidable conflicts, we offer a dropped-quiz policy (the best 10 of 12 quizzes counting toward your grade – see under “GRADES” below). The lowest grade will be dropped, for a maximum total of 120 course points. **We will not have any make up quizzes!!**

To access the assessment quizzes, click on "Assessments" in Sakai. The quizzes are scheduled as indicated in the schedule. The quizzes will be opened for you to take them on the days listed, and the time period you'll be able to take the quiz is anytime during the 24-hour period that defines that particular day. NEW: For this term you will now have a 60 minute time limit to take the quiz. So, be ready with all that you need to take the quiz before you start (calculator, periodic table and info sheet etc.). No makeup quizzes will be given for any reason. **Computer issues that may arise will not be negotiated.** To accommodate unavoidable conflicts or computer issues that may arise, we offer a dropped-quiz policy (the best 10 of 12 quizzes counting toward your grade – see under “GRADES” below). It is suggested that you do the assessments early enough in the day to avoid last-minute time or computer issues.

DISCUSSION: First discussion will start the week of January the 13th. Day and location is based on your section number!

Your assignment for week 1 is to go find both your discussion section location and the CLC!

EXAMS: **Three** progress exams and a **cumulative** final exam will be given in the course. All exams will be **given in the evening (8:20 pm start time)** and rooms will be assigned by section number and posted on Sakai so **learn your section number!** Be on time and bring a calculator (non-graphing) and pencil to the exam room nothing else. **NO NOTES OR INFORMATION SHEETS, NO COMPUTERS, CELL PHONES** or any information storage device electronic or paper. If you must be absent from an exam due to a documented and approved academic or UF athletic conflict, bring the documentation to your instructor **beforehand** (**at least one week prior to the scheduled exam**). You may take the exam early **for approved reasons**. You may not take exams late for any reason. Planned or emergency trips home or elsewhere are **not** approved conflicts.

No makeup progress exams will be given for any reason. We have no mechanism with such a large number of students for makeup exams. **Exam dates are clearly indicated on the syllabus. Final Exam keys/solutions will NOT be posted!** Final Exam may not be taken early. Grades will be posted within 24 hours most of the time. Should you not see your grade on Sakai it is YOUR responsibility to inform me. Students may NOT use graphing calculators on exams, you must use a scientific calculator with exponents, log and ln functions. No other device may be used as a calculator i.e. cell phone, iPods etc. **Calculator dies during the exam, no do-over. I suggest you bring a spare.** No cell phones are allowed in the exam rooms. **We do not curve exams so don't expect this.** Sample progress exams are posted. Do not use these as an absolute guide to the problems you will get this term.

Please note the exam absence link http://iteach.chem.ufl.edu/Exam_Absence_Policy_GChem_s13.pdf

Information on current UF grading policies for assigning grade points
<https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>.

Feedback: “Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at <https://evaluations.ufl.edu>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results/>.”

Student Responsibilities:

- 1. You are required to attend all classes and discussions. (No you don't get points for doing what you are supposed to do like coming to class.)** You don't show to class it is up to you to find out what you missed. You are responsible for everything I say in lecture even if you don't come. Read the syllabus and check the online notes. I have my class video recorded, how to access the videos will be posted. **DO NOT depend on reviewing these the day before exam or use this as an excuse for not attending class.** Note: You cannot sit and watch 3 hours in a row of my lectures and be successful in the class.
- 2. You are required to read and follow the syllabus it is a grading contract.** You fail to comply and you will lose the points!
- 3. You must make check Sakai on a regular basis to make sure all your grades are posted or if an announcement is made. If you find something is wrong you must see me I will be glad to fix the problem. Come see me for missing electronic homework and exam grades and do so promptly. Do not wait until after the course ends, I will not be understanding.**
- 4. Exam grades are posted promptly, usually within 24 hours unless we have a problem. So, if yours does not show see your instructor. Scantron errors are not negotiable.** This includes Form Code errors, registry errors, name and UFID numbers to name a few. If you wait until the last few days of the semester to discover an incorrect grade you may lose points. **DO NOT WAIT TO POINT OUT A MISSED GRADE! If you come to me after the last day of class you will lose the points no discussion!**
- 5. Final Exam keys/solutions will NOT be posted!**
- 6. You must work “lots of problems”, lots is different for everyone.** These include end of chapter problems, problems on the notes / power point slides I have posted. Do not come to me with I did all the problems you said but still failed the exam. You take 20 minutes to do a problem at home but on the exam you have only 5 minutes to do the same problem. If you can't work a problem in 5 minutes you did not do enough problems!
- 7. You must keep up with the lecture material, the on-line homework and quiz material. All due dates are posted either on the syllabus or the course home page so you have no excuse what so ever for missing or not knowing a due date. At first you may know the material and think you can**

slack off, don't do this it will harm your grade. Keep working, things happen fast here and once you get behind you may not be able to catch up.

8. **Please do not e-mail me with mundane and trivial questions.** Read the syllabus and review the lecture video. If you want me to do something for you then you come see me at the start or end of class. Office hours will be posted on the course home page and on my office door. If I am in I will answer the phone.
9. If you need help get it early, help is available. The Chemistry Learning Center in Flint 257-278 it will have graduate students to assist you. A schedule with TA names and their times in the CLC will be posted on the course home page. You also have Broward Hall services.
10. Learn how to fill out a scantron. Scantron errors are not negotiable. This includes Form Code errors, registry errors, and name and UFID numbers. Make it hard for me to post your grade and you will lose points. You WILL BE penalized for scantron errors that require me to do extra work to get your grade into the Sakai grade book. First offense 9 points (this means that your grade will end in a 1 not a 0), second offense 18 points, third offense 24 points and fourth offense 36 points. It pays to learn how to fill out a scantron properly. A copy of a scantron is below look at it. We will give you a scantron for each exam at the start of the exam.
11. **If you want to see your scantron you MUST come see me within 5 school days of the exam. They will not be e-mailed or given to a second party.**
12. Need an interview for First year Florida I will do them but only in a group and only a few days. I will announce this in class.

SCORING: Your grade for the term will be determined as follows:

Progress Exams (best 2 of 3@ 250 pts each)	500
WEB Assign homework (about \$35) does not come with the text	80
On Line Assessments Quizzes (best 10 of 12 @ 12 points each)	120
Final Exam	300
TOTAL	1000 pts

Grades will not be curved. The following grade cutoffs will be used: This is fixed; points will not go up. We are now using minus grades so your grade will be based on the scale below. Off by one point you get the grade you earned.

A = 900 - 1000	B - = 760 - 799	D + = 630 - 659
A - = 860 - 899	C + = 730 - 759	D = 600 - 629
B+ = 830 - 859	C = 700 - 729	E < 600
B = 800 - 829	C - = 660 - 699	
	Failing grade	

On-line Homework: Sections of WEB Assign will be assigned regularly. The points you see on Sakai will be your course **Web Assign points, max 80**. WEB Assign points will be up dated on Sakai several times during the semester, usually when exam grades are posted.

Each posting is the new total of the points you have. Keep up with your WEB Assign grade and know your due dates. If you wait till after the classes end to discover a grade is incorrect you will lose points. We will not reopen up or extend the dates just because you missed the due date. You have several days to complete each WEB Assign assignment. Do not wait till the last minute to do your assignments! Computer and server problems are yours and will not be considered.

Sakai: To access Sakai you should go to the website: <http://lss.at.ufl.edu> . Choose "Sakai", then "University of Florida". To log in, you must use your GatorLink username and password. If you do not yet have one, you must

obtain one. If you have any problems with your GatorLink name or password you should contact the Help Desk at 392-HELP, or go to 520 CSE. They will only help you with GatorLink items, not WebCT problems. For the latter, see your instructor.

WEBASSIGN (ON-LINE) HOMEWORK: You must purchase Webassign it is NOT included with the text.

When you log into <https://www.webassign.net/ufl/login.html> you should see a “Log-In” button for WebAssign – this will be your entry into WebAssign. No separate WebAssign password is necessary. This should be the only way to access WebAssign properly.

You’ll have a free grace period (14 days or so) to use WebAssign before you have to pay about \$30 for the semester.

WebAssign assignments for each textbook chapter will be due on the dates listed in WebAssign – due times for each due date are just before midnight - it is up to students to be aware of WebAssign due dates. Do not wait until the last minute to attempt to complete WebAssign assignments, because computer issues can arise at any time, and you don’t want to be left at the last minute not being able to complete your assignments on time due to some technical error.

Correct answers to WebAssign assignments require very precise attention to significant-figure rules – if you do not fully understand the usage of significant figures, you should read pages 25-28 in your Silberberg textbook (or another source for detailed significant-figure instruction). Also, the correct answers to WebAssign assignments sometimes have narrow acceptance windows – you must be very careful in the numbers you use for calculations and how you carry them through the problem-solving procedure.

You'll have three (3) attempts for each problem question. The WebAssign User Guide is at http://www.webassign.net/manual/WebAssign_Student_Guide.pdf and the WebAssign Student Technical Support is at http://www.webassign.net/user_support/student/

Please do not email instructors about WebAssign problems - if you need help, come to office hours or the CLC for help - be sure to have the problem printed out in full and show what work you've done. Again, pay extra careful attention to significant figure rules because WebAssign is not tolerant of incorrect sig figs.

Correct answers to WebAssign assignments require very precise attention to significant-figure rules – if you do not fully understand the usage of significant figures, you should read pages 25-28 in your textbook. Also, the correct answers to WebAssign assignments have very narrow acceptance windows – you must be very careful in the numbers you use for calculations and how you carry them through the problem-solving procedure. Here is a word type problem that students have great difficulty with and you **must** master it. The question is what is the name of HCl(g)? You answer hydrochloric acid, and that is wrong! HCl as a gas is hydrogen chloride, HCl(aq) is hydrochloric acid. Understand what is being asked, answer that question and not the question you want to answer!

Finally, you’ll notice that many of the WebAssign problems have information next to the problem number (things like “EOCP” which refers to Silberberg EndOfChapterProblem such-and-such, so that you can consult the Silberberg textbook problem and the posted online solutions to find out how the problem is solved if you have any difficulties). The WebAssign User Guide is at http://www.webassign.net/manual/student_guide/index.html and the WebAssign Student Technical Support is at http://www.webassign.net/user_support/student/

HONOR SYSTEM: All exams are given under the Honor System. Any student caught cheating will receive the maximum punishment I can bring to bear. (Cheating of any kind will result in a grade of E.) Check the website for the UF policy on honesty and cheating: http://www.dso.ufl.edu/stg/Code_of_Conduct.html

“UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code (<http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/>) specifies a number of behaviors that are in violation of

this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.”

CHEMISTRY LEARNING CENTER (CLC): There is free help to be had from graduate student teaching assistants in the CLC Monday through Friday in Flint Hall 257 and 258. Your discussion TA will have office hours in the CLC, but you may go there anytime and see any TA to get help on questions pertaining to chemistry. A schedule of the TA schedules will be posted in the corridor outside the CLC and on e-Learning.

The CLC ends their office hours the last day of class I will ask them to stay for the reading days. I end my office hours the last day of class.

Other Information:

Honor Code: <http://www.chem.ufl.edu/~itl/honor.html>

Disabilities: <http://www.chem.ufl.edu/~itl/disabilities.html>

Counseling: <http://www.chem.ufl.edu/~itl/counseling.html>

STUDENT ATHLETES and official SCHOOL EVENTS: You must see me in person each and every time about taking a progress exam outside posted times that means early never late.

DISABILITY RESOURCES: “Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.”

Disability resources students must see me the first week of class. If you are applying for disability resource status please come see me the first week of class. Students requesting classroom and exam accommodations must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation. Students will then go to the disability resource center.

The Dean of Students Office provides individualized assistance for students with documented disabilities. Services are based upon student need and impact of their specific disability. There is no requirement for any student to self-identify as having a disability. However, students requesting classroom accommodations must register with the Dean of Students Office and provide the appropriate documentation verifying their disability. The Dean of Students Office determines what is and is not appropriate documentation. Examples of accommodations that are available to students include, but are not limited to, registration assistance, approval of reduced course load, course substitutions, classroom and examination accommodations, auxiliary learning aids, additional course drops when disability related, and assistance in other university activities. The designated coordinator for compliance with Section 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act (ADA) is the Assistant Dean of Students responsible for Students with Disabilities Programs, P202 Peabody Hall, 392-1261 (Voice), or 392-3008 (TDD).

The Disability Resource Center strives to provide quality services to students with physical, learning, sensory or psychological disabilities, to educate them about their legal rights and responsibilities so that they can make informed decisions, and to foster a sense of empowerment so that they can engage in critical thinking and self-determination.

Course Objectives: CHM 2045 (General Chemistry I)

You will be required to build a basic fund of knowledge of the science of chemistry covering the topics below: You will be required to analyze scientific concepts and think critically. This means being able to answer both mathematical and conceptual multiple choice problems in a limited period of time. Progress exams allow 5 minutes per questions and the Final only 4 minutes per question.

You will review the importance of chemistry in our everyday lives.

You will be required to utilize the methods of science as a logical means of problem solving.

Contact information for the Counseling and Wellness Center: <http://www.counseling.ufl.edu/cwc/Default.aspx>, 392-1575; and the University Police Department: 392-1111 or 9-1-1 for emergencies.

The Foundation of Chemistry

Matter and Energy-Basic Concepts of Chemistry

Measurements

Significant Figures

Metric System

Scientific Notation

Dimensional Analysis

Chemical Formulas and Stoichiometry

Atoms, Ions, Molecules and Compounds

Nomenclature of Inorganic Compounds

The Mole Concept

Percent Composition

Empirical Formula

Molecular Formula

Chemical Equations and Reaction Stoichiometry

Balancing of Chemical Equations

Calculations Based on Chemical Equations-moles/masses of reactants/products

Limiting Reagent Calculations

Percent Yield and Theoretical Yield Calculations

Sequential Reactions

Concentration of Solutions-Calculations Involving Mass % and Molarity

Dilution of Solutions: Calculations Involving $V_1M_1=V_2M_2$

Calculations Involving Solution Stoichiometry

Chemical Reactions

Organization of the Periodic Table

Aqueous Solutions-Strong and Weak Electrolytes

Reactions in Aqueous Solutions

Oxidation Numbers

Thermodynamics

The First Law of Thermodynamics

Enthalpy, ΔH

Calorimetry (constant-pressure and constant volume)

Thermochemical equations

Internal energy, ΔE

Relationship between ΔE and ΔH

Hess' Law

Standard enthalpies of formation and reaction

Bond energy and ΔH

The Second Law of Thermodynamics & Spontaneity

The Structure of the Atom

Experiments that led to the discovery of the fundamental particles of the atom
Subatomic Particles, Isotopes, Atomic Weight
Development of Quantum Mechanics
Quantum Mechanical Model of the Atom
Electronic Configuration and the Relationship to the Periodic Table
Orbital Diagrams
Quantum Numbers
Chemical Periodicity

Theory of Ionic and Covalent Bonding

Lewis Dot Formulas of Atoms
Formation of Binary Ionic Compounds-Coulomb's Law, Lattice Energy
Formation of Covalent Compounds
Lewis Structures for Molecules and Polyatomic Ions and the Octet Rule
Resonance and Formal Charges
Exceptions to the Octet Rule for Lewis Structures
Polar and Nonpolar Covalent Bonds

Molecular Structure

Valence Shell Electron Pair Repulsion Theory (VSEPR)
Electronic and Molecular Geometry and Molecular Dipole Moments
Valence Bond Theory and Hybridization of Orbitals
Molecular Orbital Theory

Gases

Gas Laws and Ideal Gas Law
Density and Molar Mass
Stoichiometry of Reactions Involving Gases
Kinetic Molecular Theory-Molecular Speeds
Real Gases

Liquids and Solids

Intermolecular Attractions and Phase Changes
Physical Processes and Properties of Liquids
Melting Point/Boiling Point
Phase Changes of Matter and Phase Diagrams
Molar Heat of Vaporization and Molar Heat of Fusion

Solutions

Dissolution Process for Solids, Liquids and Gases
Factors Affecting Solubility
Saturated, Unsaturated and Supersaturated Solutions
Other Units of Concentration
Colligative Properties

1. Vapor Pressure Lowering
2. Boiling Point Elevation
3. Freezing Point Depression
4. Osmotic Pressure

Chemical Kinetics:

Rate of a reaction
Factors that affect reaction rates

- a. Nature of reactants
- b. Concentration of reactants: Rate-law expressions & Reaction order

c. Concentration vs. time: Integrated rate equations and half-life

Collision theory, activation energy

Transition state theory

Mechanisms and Rate-law expressions

Arrhenius equation: temperature and rate

Catalysts

Chemical Equilibria

Dynamic equilibria

Equilibrium constant K_c

Reaction quotients

Calculations with K_c

Heterogeneous equilibria

K_p and K_c

Le Chatelier's Principle: factors affecting equilibria
