CHM2096 – Chemistry for Engineers II – Spring 2021

COURSE INSTRUCTOR: Dr. Maria Korolev Email (for administrative purposes): via Canvas Office hours: Mondays, Wednesdays, Fridays from 3:00pm to 4:00pm on Zoom

COURSE DESCRIPTION: CHM2096 constitutes the second semester of the two term sequence of general chemistry, CHM 2095/2095L - 2096/2096L. CHM2096 serves to teach: the scientific method, skills for problem solving, general chemistry knowledge, and a connection to the principles that govern the natural world. Prerequisite information and credit suitability can be found in the Undergraduate Catalog.

COURSE DELIVERY: The lectures for this course will be taught in a HyFlex format, with some students in face-toface sections and others in online sections. Lectures will be held on Mondays, Wednesdays, and Fridays from 1:55pm to 2:45pm. Students who are in face-to-face sections will attend lecture in CLB130 during the lecture period. Students who are in online sections will attend the lecture synchronously on Zoom. Discussion sections for this class will meet on Thursdays during different time periods as indicated on ONE.UF. All discussions sections will be held online on Zoom. Any class or discussion section cancellations will be announced in advance.

Dates	Topics (# of lectures) Silberberg Chapters				
Jan 11 – Jan 13	Intro & Kinetics (2)	Chapter 16			
Jan 15 – Jan 25	Chemical Equilibria (4)	Chapter 17			
Jan 27 – Feb 5	Acids and Bases (5) Chapter 18				
February 9	Progress Exam 1 (8:20pm – 10:20pm) Cumulative				
Feb 8 – Feb 15	Buffers and Titrations (4)	Chapter 19			
Feb 17 – Feb 24	Ionic Equilibria (4)	Chapter 19			
Feb 26 – Mar 5	Thermodynamics (4)	Chapter 20			
March 10	Progress Exam 2 (8:20pm – 10:20pm)	Cumulative			
Mar 8 – Mar 22	Electrochemistry (7)	Chapter 21			
Mar 26 – Apr 5	Inorganic Chemistry (4) Chapter 23				
Apr 7	Progress Exam 3 (8:20pm – 10:20pm) Cumulative				
Apr 7 – Apr 12	Nuclear Chemistry (3) Chapter 24				
Apr 14 - Apr 19	Organic Chemistry (3)	emistry (3) Chapter 15			
Apr 21	Final Review	Final Review			
Saturday, April 24 th	Final Cumulative Exam (10:00am-12:00pm)	Cumulative			

COURSE SCHEDULE (the lecture schedule is tentative, but exam dates will not change):

*The topics that will be covered from each chapter will be selective and announced in class.

REQUIRED MATERIALS:

Required: Top Hat Subscription for in-class clicker questions. Recommended: Chemistry Textbook by Silberberg (any edition).

COVID STATEMENT: Our class sessions may be audio visually recorded for students in the class to refer back and for enrolled students who are unable to attend live. Students who participate with their camera engaged or utilize a profile image are agreeing to have their video or image recorded. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate orally are agreeing to have their voices recorded. If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type questions and comments live. The chat will not be recorded or shared. As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

We will have face-to-face instructional sessions to accomplish the student learning objectives of this course. In response to COVID-19, the following policies and requirements are in place to maintain your learning environment and to enhance the safety of our in-classroom interactions:

(1) You are required to wear approved face coverings at all times during class and within buildings. Following and enforcing these policies and requirements are all of our responsibility. Failure to do so will lead to a report to the Office of Student Conduct and Conflict Resolution.

(2) This course has been assigned a physical classroom with enough capacity to maintain physical distancing (6 feet between individuals) requirements. Please utilize designated seats and maintain appropriate spacing between students. Please do not move desks or stations.

Sanitizing supplies are available in the classroom if you wish to wipe down your desks prior to sitting down and at the end of the class.

(3) Follow your instructor's guidance on how to enter and exit the classroom. Practice physical distancing to the extent possible when entering and exiting the classroom.

(4) If you are experiencing COVID-19 symptoms (<u>Click here for guidance from the CDC on symptoms of</u> <u>coronavirus</u>), please use the UF Health screening system and follow the instructions on whether you are able to attend class. <u>Click here for UF Health guidance on what to do if you have been exposed to or are experiencing</u> <u>Covid-19 symptoms</u>.

(5) Course materials will be provided to you with an excused absence, and you will be given a reasonable amount of time to make up work. <u>Find more information in the university attendance policies.</u>

CLASS DEMEANOR: In order to have an optimal learning environment, the classroom needs to be free of disruptions. Therefore, it is expected that students come to class on time and leave only when class is concluded by the instructor, and that the class is not disrupted by student talking or cell phone noises.

CANVAS: Our syllabus, gradebook, files, class announcements, and other pertinent info for the course will be posted on Canvas (<u>http://elearning.ufl.edu</u>). It is your responsibility to check Canvas often to make sure that you do not miss important announcements and to ensure that your gradebook is accurate. For computer assistance, visit <u>http://helpdesk.ufl.edu/</u>.

CONTACTING THE INSTRUCTOR / OFFICE HOURS: Emails are for administrative purposes only, and not for distance-instruction. All academic inquiries must be made during office hours or before/after lectures (if time permits). Please be prepared before coming to office hours, bring specific questions and your previous work. Questions about grades will not be discussed during office hours due to privacy regulations.

3 Progress Exams @ 20% each	60%
Final Cumulative Exam	23%
Engineering Mini-Projects	7%
Pre-Class/Top Hat	5%
Homework	5%
TOTAL	100%

GRADES: Grades for the term will be determined as follows:

The following grade cutoffs will be used (these are non-negotiable):

	00000			(
А	A-	B+	В	B-	C+	С	D+	D	D-	E
≥92%	≥88%	≥84%	≥80%	≥76%	≥72%	≥68%	≥64%	≥60%	≥56%	<56%

Information on current UF grading policies for assigning grade points can be found at: <u>https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx</u>

MINI-PROJECTS: Seven percent of your course grade will be determined by engineering projects done during your discussion sections. There will be three projects spread over the semester that will relate to material covered in lecture. Each project will be done over three weeks to be done both during discussions and outside the discussions. You will be graded on the scientific merit of your work in groups. More of the details of the activities will be discussed during the first class meeting. These activities are part of an initiative to improve this section of general chemistry, and are tied to a research grant. Due to this, you will need to complete a consent form as well as pre- and post-semester surveys. Your compliance with this will be worth points that contribute to your overall mini-project score. Your attendance is required in your registrar assigned section. If you have an unexcused absence during the discussion period for a given week, then you will score a 0 on the assignment for that week. Assignments that are submitted late will be deducted 25% credit per day late.

PRE-CLASS/TOP HAT: Five percent of the course grade will be based on pre-class and in-class assignments. The pre-class questions will be delivered via Canvas due just before class and you can do them at your own pace. The in-class questions will be presented via Top Hat during class, in pace with the lecture. Both pre-class and in-class questions will be graded based on accuracy. The lowest five grades in this category will be dropped at the end of the semester. Requirements for class attendance are consistent with university policies that can be found at: https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx

ONLINE HOMEWORK: Five percent of the course grade will be based on online homework assignments through Canvas. Each assignment has a displayed deadline. Failure to at least access a homework assignment before its due date will result in the loss of ability to access that homework for the remainder of the semester. Students that miss a homework deadline due to an excused absence can request an extension by contacting the

instructor. You will have multiple attempts to answer the homework assignments. The lowest three homework grades will be dropped at the end of the semester.

EXAMS: Exams will be taken in the evenings outside of class online via Canvas and will be proctored by HonorLock. You must use a non-graphing non-programmable scientific calculator on exams (with log, ln, root, and exponent (scientific notation) functions). Be sure to also have pencils, scrap paper, and your UFID card. No notes, papers, cell phones or other electronic devices can be in view during exams.

This course uses Honorlock for proctoring of the lab practical. Honorlock is UF's designated online proctoring service for classroom exams and quizzes that were previously in person but have moved online as part of the COVID-19 response effort. In order for you to take exams in this course you will need a government issued photo ID (or your Gator-1 ID), a working camera and microphone on your computer, a stable internet connection, and the Google Chrome browser (https://chrome.com) on your computer. Before and during your exam you will need to follow the Honorlock proctor's instructions. Please familiarize yourself with the Honorlock student guide: https://dce.ufl.edu/media/dceufledu/pdfs/Honorlock-Student-0 and the Honorlock Student Exam Preparation Information: https://dce.ufl.edu/media/dceufledu/pdfs/Honorlock-Student-0.

To alleviate the stress of potential issues that do not fall under officially-sanctioned absences, we've incorporated an "*average/replace*" policy (the lowest of the three progress exams will be replaced by the average of the three progress exams). This "average/replace" policy will help to minimize the impact of a single poor performance but it will not completely disappear. For example, if a student has the following scores: Exam 1 score of 160/200, Exam 2 score of 100/200, and Exam 3 score of 160/200, then their average progress exam score will be 140/200 and it will replace the original Exam 2 score.

EXAM ABSENCES: Absences will be handled in accordance with official UF academic regulations. For more information, see <u>https://catalog.ufl.edu/UGRD/academic-regulations/</u>. See below for further clarification for two different types of situations.

(1) Conflicts with other events: Acceptable reasons to miss a scheduled exam include conflicting evening exams in courses with higher course numbers, religious holidays, military obligations, special curricular requirements (e.g., attending professional conferences), or participation in official UF-sanctioned activities such as athletic competitions, etc. For more information on such absences see the official UF Policy at

<u>https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/#absencestext</u>). If you must be absent for an exam due to a documented and approved conflict known in advance, you must e-mail your instructor the documentation at least one week prior to the scheduled exam and an early conflict exam will be scheduled for you.

(2) Missing an exam due to an emergency or sudden illness: If you are absent for an exam due to an unpredicted documented medical reason or family emergency, you must contact the instructor as soon as possible, and you may be asked to have your excuse verified by the Dean of Students Office (DSO). Your instructor will follow UF academic regulations in evaluating the notification and/or documentation received by you or by the DSO on your behalf. Once your instructor is satisfied with the validity of your exam absence a make-up exam will be scheduled after a reasonable amount of time, i.e., before the end of the semester. If your documentation is deemed insufficient to excuse your absence you will receive a zero on the missed exam.

HONOR CODE: UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code (<u>https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx</u>) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

DISABILITIES: Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the Disability Resource Center by visiting https://disability.ufl.edu/students/get-started/. It is important for students to share their accommodation letter with the instructor and discuss their access needs, as early as possible in the semester.

U MATTER, WE CARE: Your well-being is important to the University of Florida. The U Matter, We Care initiative is committed to creating a culture of care on our campus by encouraging members of our community to look out for one another and to reach out for help if a member of our community is in need. If you or a friend is in distress, please contact <u>umatter@ufl.edu</u> so that the U Matter, We Care Team can reach out to the student in distress. A nighttime and weekend crisis counselor is available by phone at 352-392-1575. The U Matter, We Care Team can help connect students to the many other helping resources available including, but not limited to, Victim Advocates, Housing staff, and the Counseling and Wellness Center. Please remember that asking for help is a sign of strength. In case of emergency, call 9-1-1.

EVALUATIONS: Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.

GENERAL EDUCATION PROGRAM OBJECTIVES: Physical science courses provide instruction in the basic concepts, theories and terms of the scientific method in the context of the physical sciences. Courses focus on major scientific developments and their impacts on society, science and the environment, and the relevant processes that govern physical systems. Students will formulate empirically-testable hypotheses derived from the study of physical processes, apply logical reasoning skills through scientific criticism and argument, and apply techniques of discovery and critical thinking to evaluate outcomes of experiments. These objectives will be accomplished through participation in the course lectures and discussion sections, and individual work done on homework assignments and assessments.

GENERAL EDUCATION STUDENT LEARNING OUTCOMES: The following learning outcomes will be assessed

through online assessments and examinations.

Area	Institutional Definition	Institutional SLO
CONTENT	Content is knowledge of the concepts, principles, terminology and methodologies used within the discipline.	Students demonstrate competence in the terminology, concepts, methodologies and theories used within the discipline.
COMMUNICATION	Communication is the development and expression of ideas in written and oral forms.	Students communicate knowledge, ideas, and reasoning clearly and effectively in written or oral forms appropriate to the discipline.
CRITICAL THINKING	Critical thinking is characterized by the comprehensive analysis of issues, ideas, and evidence before accepting or formulating an opinion or conclusion.	Students analyze information carefully and logically from multiple perspectives, using discipline specific methods, and develop reasoned solutions to problems.

SPECIFIC GOALS: You will be required to analyze scientific concepts and think critically. This means being able to answer both quantitative (mathematical) and conceptual (qualitative) multiple choice problems in a limited period of time. Additionally you will have to write or orally communicate during your discussion periods. We will also demonstrate how these topics can be applied to the scientific method and how observation and experimentation leads us to the development of scientific theories. To achieve this, students will be introduced to the following concepts from the textbook. You will review the importance of chemistry in our everyday lives. You will be required to utilize the methods of science as a logical means of problem solving through critical thinking. This means you must analyze information carefully and logically from multiple perspectives, using discipline specific methods, and develop reasoned solutions to problems. To ensure your competency in these concepts you will be required to complete online homework assignments and take quizzes and exams that require critical thinking, analysis of problems and drawing conclusions.

DISCLAIMER: This syllabus represents my current plans and objectives. If those need to change as the semester progresses, then the changes will be communicated to the class clearly.
